

You will need to follow these steps in order to login and view any password protected pages;

1. On home page (twu555.org), select login from the left side bottom menu "Login"
2. Follow the "Need to Register? Click Here" link to the register page
3. Enter the requested information. Required fields are District, Name (first and last), Member ID (same as employee number without an e), valid e-mail address and a user name of your choosing. While the preceding were the required fields we suggest completing all fields to ensure the local has your correct contact information (for mailings, newsletters, etc). Follow the link under Officers and Staff to get your district number if unknown.
4. Click register.
5. Follow the directions to retrieve your randomly generated password. Return to website and enter in the appropriate fields to login to site under the same link you followed in step 1 (Login). You can also select "Need to change password? Click here" to change your password to one you are more likely to remember.

That is all it takes to register at the redesigned Local 555 website. We hope these directions help in making the transition to the new site as easy as possible.
